

MEASURING IMPACT (DATA, STORYTELLING & REPORTING)

How you track & report your impact.

SUPPORTED BY

See Opportunity. Take Action. Enable Progress | enactus.org

LOCAL ACTION. GLOBAL IMPACT.

50,000 STUDENTS

1,050 UNIVERSITIES

2,690 PROJECTS

1,000,000+ LIVES IMPACTED

FROM 1 SEPTEMBER 2024 TILL 31 AUGUST 2025.

Every number reflects action. Every project, a purpose.

This is Enactus: a community of students, academics and business leaders using entrepreneurial action to tackle challenges, regenerate communities, and shape a more inclusive, thriving world.

Together, we are Generation Regeneration — changemakers with a head for business and a heart for the world.

As an Enactus student, you:

- work in teams to design and run real projects
- address social, economic, and environmental challenges
- learn by doing — with guidance from Faculty Advisors, alumni, and partners
- join a worldwide network of young leaders who want to make a meaningful difference

You are not just joining a club. You're joining a global movement of students in more than 30 countries who are building solutions that improve lives today and shape the future of work, business, and society.

OUR NETWORK OF ENACTUS COUNTRIES. #WEALLWIN

#GENERATIONRE | #ENACTUS | #WEALLWIN

About the Enactus 101 Series

This guide is part of the Enactus 101 Series — a set of simple, practical guides designed to help you learn, lead, build projects, measure your impact, and grow as a changemaker. We encourage you to explore the full series throughout the year.

WHAT THIS GUIDE IS / IS NOT

What This Guide Gives You

- A clear understanding of how Enactus defines impact, data, and storytelling
- Practical tools to help you measure impact throughout your Impact Journey
- Guidance for collecting accurate, ethical, meaningful data
- A simple framework for turning data into compelling stories for judges, funders, partners, and communities
- Real examples from the ReThread project
- Reflection prompts for your personal learning goals
- Best practices for fun, simple data collection that makes reporting easier

What This Guide Does Not Include

- Competition rules (see Competition Handbook)
- Full project development (see Guide 3)
- Country-specific reporting requirements
- Team structure guidance (see Guide 2)

Contents of this Guide:

- How to Think About Impact
- Enactus Impact Definitions (2025)
- Why Measurement Matters
- How Data Strengthens Storytelling
- The Enactus Impact Journey
- Tools & Methods for Data Collection
- ReThread Example: Turning Data Into Story
- Making Measurement Fun
- Personal Learning Pathways
- Enactus Tips
- Space for Notes
- About the Enactus 101 Series

SPACE FOR NOTES:

HOW TO THINK ABOUT IMPACT

THE IMPACT MINDSET

Impact is not what you did. *Impact is what changed because of what you did.*

This mindset shift is the foundation of strong project work.

- Outputs describe activity.
- Impact describes transformation.
- Storytelling connects the two with meaning.

When teams focus only on activity (“we trained 50 people”), their story falls flat. When teams measure change (“36 people applied new skills and increased income by 28%”), everything becomes clearer — your leadership, your innovation, your business model, and your real-world contribution.

Impact measurement is not paperwork. It is a leadership skill. It helps you make better decisions, learn faster, and create deeper change.

ENACTUS TIPS & EXERCISES

Practise Thinking in Impact

Try this quick exercise with your team:

- Take one sentence about your project (e.g., “We trained 20 people”).
- Rewrite it as a change (“12 people gained new skills and now earn income”).
- Rewrite it again as a story (“Amina now earns weekly income using skills she never had before”).
- What changed because of what we did — and what does that teach us?

Do this with two or three project examples — you’ll be surprised how quickly your team shifts to speaking in impact, not activities.

IMPACT DEFINITIONS — AND WHY THEY MATTER

Impact definitions are widely used in social innovation, evaluation, and Theory of Change work. Enactus uses these definitions to give all teams a clear, shared way to understand and measure change.

They help you plan stronger projects, collect meaningful data, and communicate your results in a way that is fair, consistent, and easy for judges and partners to understand.

How they guide your project

These definitions help you understand:

- What effort is (inputs, outputs)
- What change is (direct + indirect impact)
- What visibility is (reach)
- What potential is (projections)
- What lasting transformation looks like (sustainable long-term impact)

When you know the difference, you make better decisions, measure the right things, and tell clearer stories.

How they guide your measurement

The definitions help you track impact across every step of the Impact Journey:

- **IDEA** — collect baseline data
- **ACTION** — separate tests from outcomes
- **REFLECT** — compare before ↔ after
- **IMPACT** — identify what truly changed
- **REPORT** — communicate your results clearly

How they guide competition judging

Judges use the definitions to evaluate:

- *Accuracy:* Did you measure real change?
- *Attribution:* Did your team actually cause the change?
- *Clarity:* Is your impact easy to understand?
- *Credibility:* Is your evidence trustworthy?

Clear definitions protect fairness across the global network and help judges compare projects consistently.

UNDERSTANDING THE IMPACT DEFINITIONS (I)

Below **definitions protect the integrity of your work**. They help distinguish between effort and results.

Inputs

The resources the team invests in their project, including time, money, partnerships, skills.

ReThread Example

Students invested 220 volunteer hours, sewing equipment, and partnerships with clothing banks.

Outputs

The immediate, tangible products or services resulting from the team's efforts. This includes activities, goods, or services the project delivers.

Outputs are not impact.

ReThread Example

5,280 garments upcycled. 18 tailoring workshops held.

Direct Impact

Reflects the measurable improvements in knowledge, skills, behaviours, or resources among individuals or organisations with whom the team directly worked. These outcomes represent the short- to medium-term outcomes caused by the team's direct intervention (not their project partners).

The core objective of your Enactus projects!

ReThread Example

27 out of 31 ReThread participants secured employment after completing the training program.

Indirect Impact

Those who indirectly gain measurable improvements in knowledge, resources, or benefits from the project but with whom the team did not work directly.

ReThread Example

Families of ReThread participants benefited from more stable income.

SPACE FOR NOTES:

UNDERSTANDING THE IMPACT DEFINITIONS (2)

Below **definitions protect the integrity of your work**. They help distinguish between effort and results.

Reach

Measures the number of people exposed (e.g. media reach, awareness campaigns, application downloads etc.) to the project but does not necessarily indicate direct or indirect impact. While reach is an important metric, it does not reflect measurable change and therefore should not be classified as impact.

Income / Revenue

The total amount of financial resources a team and/or its project(s) has generated from activities such as sales, grants, sponsorships, or donations. This relates to income generated by the team, not by its project partners.

Profit / Surplus

The money remaining after deducting all expenses from the income/revenue generated. This can be both team/project related.

Profit / Surplus

The money remaining after deducting all expenses from the income/revenue generated. This can be both team/project related.

Sustainable Long-Term Impact

The lasting and significant changes in people's lives that continue beyond the project period. This represents the ultimate societal, environmental, or economic improvements that persist after direct project activities have ended and come as a result of a series of interventions and outcomes.

This impact is rarely achieved during the Enactus project timeline

Projections

Show what might happen in the future, based on your current success. While helpful for showing long-term potential, judges will primarily focus on the actual impact you've achieved this year.

UNDERSTANDING THE IMPACT DEFINITIONS (3)

DEFINITIONS AT A GLANCE & SIMPLIFIED

DEFINITION	WHAT IT IS	WHAT IT IS NOT
Inputs	Resources Invested	Not an activity
Outputs	Activities/products/services	Not direct Impact
Direct Impact	Measurable change in people you worked with directly	Not reach
Indirect Impact	Ripple effects on others	Not assumed impact
Reach	People exposed	Not change or direct impact
Sustainable Long-Term Impact	Enduring improvements	Not projections
Projections	Future expectations	Not measurable impact

ENACTUS TIPS

Common mistakes to avoid:

- Reporting outputs as impact (“we trained 50 people”)
- Reporting partner impact instead of student team impact
- Confusing reach with direct impact
- Measuring only at the end
- Not collecting baseline data
- Using long surveys no one wants to answer
- Inflating numbers without evidence

SPACE FOR NOTES:

WHY MEASUREMENT MATTERS

Correct data collection helps you:

✓ **Make smarter decisions**

Measurement identifies what's working.

✓ **Strengthen your business model**

Data helps refine pricing, cost structures, product quality, and customer insights.

✓ **Demonstrate entrepreneurial leadership**

Evidence shows initiative, learning, and adaptive thinking.

✓ **Build credibility**

Judges, funders, and partners trust projects with clear data and transparent reporting.

✓ **Scale responsibly**

You can't replicate what you can't measure.

ENACTUS TIPS & EXERCISES

Learn the definitions together!

Understanding impact definitions becomes easier when you practice using them. Try these quick team exercises:

- **Sort it out:** Give your team a list of statements (e.g., "We held 5 workshops," "10 participants increased their income"). Ask them to sort each into output, direct impact, indirect impact, or reach.
- **Before → After exercise:** Pick one part of your project and define its before and after. This makes outcomes more visible.
- **Spot the impact:** Review last year's project report and highlight every line that represents real impact.
- **Definition pitch:** In pairs, explain one definition to each other in one sentence — if you can teach it, you understand it.

These small exercises help your whole team speak the same language — and measure impact with confidence.

HOW DATA MAKES STORYTELLING POWERFUL

Great stories change hearts. Great data changes minds. Strong Enactus teams use both.

DATA GIVES YOUR STORY CREDIBILITY

A judge, investor, or partner asks silently:
“How do you know this worked?”

Your answer must show:

- evidence
- comparison
- clarity
- attribution
- honesty

STORYTELLING GIVES YOUR DATA MEANING

Data without story is flat. Story without data is unconvincing.

Together, they show:

- the human experience
- the measurable result
- the journey of transformation

ReThread Example

“Miriam attended 3 ReThread workshops. She learned tailoring and interview skills. She secured a job. Her income increased. And she said: ‘I finally feel like I belong in the workplace.’”

DATA-DRIVEN STORYTELLING OPENS DOORS

It helps you:

- win grants
- attract customers
- build trust with beneficiaries
- secure partnerships
- impress judges
- create compelling annual reports
- expand your project
- support your learning journey

Data is not just reporting. Data guides you reaching your objectives.

IMPACT MEASUREMENT & YOUR IMPACT JOURNEY

IMPACT EMERGES THROUGHOUT THE JOURNEY, NOT AT THE END

Impact isn't something you measure at the end — you build it, shape it, and observe it throughout your entire Enactus journey.

Every interview, test, prototype, conversation, and reflection helps you understand what is changing and why.

When you track your learning and your project's results at each stage, you strengthen your ideas, deepen your leadership, and make it easier to tell a clear, compelling story of the difference you are creating.

ENACTUS TIPS

You measure in each stage of the journey

- **IDEA:** Understand the challenge through interviews, empathy, and baseline data.
- **ACTION:** Collect feedback, test assumptions, track outputs, and observe behaviours.
- **REFLECT:** Compare before/after, analyse what's working, and adjust your model.
- **IMPACT:** Capture outcomes, stories, and evidence to communicate your results clearly.

Every stage gives you information that strengthens your solution — and more importantly, strengthens your ability to lead change.

TOOLS & METHODS FOR MEASURING IMPACT

GROUNDING IN HUMAN-CENTERED, ENTREPRENEURIAL & REGENERATIVE MINDSETS

Impact measurement is most powerful when it mirrors the way we understand people, test ideas, and improve systems.

Rather than seeing measurement as “data collection,” think of it as learning in motion — a continuous flow of insight that helps you refine your project and deepen your impact.

Every method below reflects the core thinking that drives Enactus:

- Design Thinking: start with people
- Entrepreneurial Thinking: test, learn, iterate
- Systems Thinking: understand relationships & ripple effects
- Regenerative Thinking: look for long-term improvement and renewal

By using these mindsets, you can make measurement more meaningful, more human, and more useful — not just for reporting, but for leading real change.

HUMAN-CENTERED DESIGN THINKING

Human-centered design starts by understanding people’s real experiences — their needs, challenges, and what matters in daily life.

How it helps

- Reveals true priorities
- Builds trust and co-creation
- Avoids assumptions
- Leads to solutions that fit real lives

Explain it simply:

Design solutions with people, not just for them.

In practice:

Empathy interviews, observation, journey mapping, co-creation moments.

SYSTEMS THINKING

Problems like waste, inequality, or climate pressures exist within larger systems. Systems thinking helps you see the connections clearly.

How it helps

- Uncovers root causes
- Shows how factors interact
- Reveals leverage points
- Supports long-term change

Explain it simply:

See the bigger picture so you know where your project can make the greatest difference.

In practice:

System maps, stakeholder mapping, identifying bottlenecks and relationships.

REGENERATIVE THINKING

Regenerative thinking focuses on restoring, renewing, and strengthening the systems you work in — socially, ecologically, and economically.

How it helps

- Aims for long-lasting, positive change
- Supports resilience in people and ecosystems
- Encourages solutions that give back more than they take
- Inspires future-focused impact beyond the project cycle

Explain it simply:

Leave the place, people, or system healthier than you found it.

In practice:

Designing for long-term wellbeing, reducing harm, enhancing local capacities, strengthening natural or social systems over time.

ENTREPRENEURIAL THINKING

Entrepreneurial thinking helps you turn ideas into practical, testable solutions that create value, adapt quickly, and sustain impact over time — if you want to revisit the full definition, see Guide 3 of the 101 Series.

TOOLS & METHODS FOR MEASURING IMPACT

HOW TO GET THE MOST OUT OF IMPACT MEASUREMENT

I. BEGIN WITH PEOPLE (HUMAN-CENTERED DESIGN THINKING)

Before you design a solution, you must understand lives, needs, challenges, motivations, and constraints.

How:

- Hold short empathy conversations
- Observe daily realities
- Capture quotes, emotions, stories
- Ask “why?” again and again

What you’re doing:

Building a portrait of the system as people experience it. *This is your baseline — your “before.”*

Why this matters:

When you understand people deeply, your data becomes more meaningful. You measure what matters, not just what is easy to count.

ENACTUS TIPS

What is empathy mapping?

Empathy mapping is a simple tool from human-centered design that helps you understand the people you are designing with — not just what they do, but what they think, feel, say, and experience.

It helps you step into their world so you can design solutions that truly fit their needs.

An empathy map helps you explore:

- What they **SEE** around them
- What they **HEAR** from others
- What they **THINK & FEEL** (hopes, frustrations, motivations)
- What they **SAY & DO** in daily life
- Their **PAINS** (barriers)
- Their **GAINS** (what success looks like to them)

Why it’s useful:

- Reveals insights you might miss through surveys alone
- Helps you understand the deeper “why” behind behaviours
- Makes your impact measurement more meaningful
- Strengthens your storytelling by grounding it in real human experience
- Ensures your project is built with people, not just for them

Use empathy mapping early and often — it will guide your questions, clarify what outcomes matter, and help you design a solution people genuinely value.

TOOLS & METHODS FOR MEASURING IMPACT

HOW TO GET THE MOST OUT OF IMPACT MEASUREMENT

2. CAPTURE REALITY, NOT ASSUMPTIONS

This stage is about grounding your project in truth, not expectations.

Look for:

- actual behaviours (not intentions)
- real constraints
- missed opportunities
- surprising patterns

Design Thinking: reveals what is actually happening

Systems Thinking: reveals why it is happening

Entrepreneurial Thinking: reveals where the opportunity is

Regenerative Thinking: reveals what could be strengthened or renewed

Your measurements become a map — showing where the system is now, and where it could go.

3. TEST YOUR ASSUMPTIONS EARLY (ENTREPRENEURIAL THINKING)

Once your idea takes shape, start gathering evidence through quick tests and experiments.

How:

- Try small prototypes
- Run pilot sessions
- Observe reactions in real time
- Ask users, “What worked? What didn’t? Why?”

Don’t wait for perfection — create to learn.

Why it matters:

These insights help you refine your solution early, before investing too much time or resources. This stage should feel fast, constructive, hands-on, and creative.

ENACTUS TIPS

Measure *what* actually changed — not what you hoped would change. Truth strengthens your project.

TOOLS & METHODS FOR MEASURING IMPACT

HOW TO GET THE MOST OUT OF IMPACT MEASUREMENT

4. LEARN FROM THE SYSTEM (SYSTEMS THINKING)

As your project unfolds, start noticing the interconnected effects:

- How does your solution change people's behaviour?
- How does one improvement influence another?
- What ripple effects appear outside your immediate project?
- Who else is impacted indirectly?

Systems thinking encourages you to look not only at individuals, but at relationships, processes, patterns, and environments.

5. LOOK FOR REGENERATIVE OUTCOMES (REGENERATIVE THINKING)

Regenerative thinking invites you to ask:

- "What is becoming healthier, stronger, or more resilient?"
- "How does this community, environment, or system improve over time?"
- "Are we restoring something that has been lost?"

Here you begin to see:

- long-term improvements
- skills that continue beyond your involvement
- livelihoods strengthened
- ecological outcomes that persist
- new capacities that grow independently

This is where long-term, sustained impact emerges.

ENACTUS TIPS

What is systems mapping?

You may have heard of systems mapping — a simple tool that helps you see how people, resources, and challenges are connected.

Why it helps

- Reveals root causes (not just symptoms)
- Shows how one change creates ripple effects
- Highlights leverage points where your project can make the biggest difference

What it is

A visual way to understand the relationships in a system: who is involved, how things flow, where barriers exist, and where opportunities for positive change appear.

Systems mapping helps you step back, see the bigger picture, and understand where your work can have the most meaningful impact.

The Enactus Impact Journey, the Enactus Social Business Canvas & the Enactus Criterion work together. They also support you in your impact measurement and project reporting

MAPPING YOUR IMPACT JOURNEY: WHAT HAPPENS WHEN?

You'll return to the **Roadmap, Social Business Canvas, and Enactus Criterion** throughout the year. Together, they form a living framework that guides your decisions and impact measurement — helping you see what's changing, why it's changing, and how to strengthen your impact as your project evolves.

1. IDEA — Establish the Baseline

What is the current reality — socially, economically, environmentally, emotionally?

You gather:

- stories
- observations
- simple measures
- emotional cues
- needs and challenges

Outcome: You understand what needs to change and what you will measure later.

2. ACTION — Test & Explore

What happens when people try your solution?

You gather:

- feedback
- reactions
- simple behavioural data
- patterns ("most participants struggled with X")
- financial insights (pricing, costs, purchasing behaviour)

Outcome: You learn where your solution succeeds, where it needs refinement, and where opportunities emerge.

3. REFLECT — Compare & Reflect

What changed — and why? What didn't change — and why not?

You look at:

- before → after
- what people did differently
- what surprised you
- what the system reveals
- what needs redesign

Outcome: You understand your impact so far and how to improve your approach.

4. IMPACT — Measure your outcomes

What direct and indirect impact did your project create?

Now you measure:

- changes in skills
- changes in knowledge
- changes in income or costs
- changes in environmental conditions
- changes in confidence
- ripple effects in families or communities

Outcome: You have the evidence you need to communicate your story authentically.

5. Tell the STORY With Depth & Evidence

Now that you understand what changed, you can tell a story that is:

- **Human:** grounded in lived experience
- **Clear:** supported by measurable change
- **Credible:** backed by comparisons and real evidence
- **Inspiring:** showing regeneration, empowerment, resilience
- **Entrepreneurial:** demonstrating innovation and leadership

This is the moment when impact becomes visible to others — judges, funders, partners, and communities.

6. REPORT & Reflect Forward

Your measurement becomes your fuel for:

- scaling your solution
- improving your model
- strengthening your partnerships
- attracting funders
- preparing a stronger competition presentation
- planning your next cycle of impact

The Enactus journey is not linear — you go through these steps again and again.

Each cycle creates deeper understanding and stronger impact.

JOIN > IDEA > ACTION > REFLECT > IMPACT > (ELEVATE)

RETHREAD: TURNING DATA INTO STORY

A clear example of how evidence becomes impact – and impact becomes narrative.

BASELINE (IDEA PHASE)

Through interviews, observations, and systems mapping, **the team discovered:**

- Factories were producing large volumes of textile offcuts every week.
- Young women had tailoring skills but lacked workspace, childcare, and market access.
- Retailers were seeking sustainable, locally made products but could not source them reliably.
- Waste collectors were handling textile waste informally and unsafely.

Baseline insight: *There was plenty of waste, demand for sustainable products, and women looking for flexible income – but the system lacked the connections to turn these into opportunity.*

DIRECT IMPACT (IMPACT PHASE)

Measured outcomes included:

- Women trained in tailoring and upcycling skills.
- Ten women earning regular income through sustainable product creation.
- Increased confidence and financial autonomy among participants.
- Textile waste diverted from landfills and repurposed into valuable products.
- Retailers gaining access to consistent, sustainable local products.

OUTPUTS (ACTION PHASE)

During **pilot testing and early operations**, the team:

- Developed three prototypes (denim tote bags, patchwork sleeves, and accessories).
- Tested prototypes with retailers and in community settings.
- Delivered training using a simplified tailoring and upcycling module.
- Secured a more stable textile waste supply through a partnership with a local factory.

THE “RETHREAD STORY”

“Waste became value. Skills became income. Partnership became opportunity.”

This is how measurement becomes meaning – and how meaning becomes a memorable story.

SPACE FOR NOTES:

SOME FINAL RECOMMENDATIONS!

MAKING MEASUREMENT FUN

Measurement doesn't have to feel dry — small creative habits can make it energising and part of your team culture.

- **Create an impact dashboard** using simple tools like Google Sheets, Excel, Miro, or Notion. Keep it colourful and easy to update.
- **Gamify your progress** — set small milestones, add icons or badges, or track streaks (“three weeks of consistent interviews!”).
- Rotate an **“Impact Storyteller of the Week.”** Let someone highlight the most interesting quote or insight gathered.
- Host short, fun **“data parties.”** Bring snacks, play music, and update your insights together.
- **Celebrate every small win** — a useful interview, a strong prototype test, a surprise insight.
- **Use visual tools** (Canva, Figma, Miro) to **turn data into colourful posters** or mini-infographics.
- Turn quotes into inspiration. **Print out meaningful beneficiary quotes** and display them in your workspace.

When measurement feels shared, creative, and light, it becomes something your team looks forward to — not something you avoid.

ENACTUS TIPS

Personal Learning Pathways

Just like your project evolves, you are also on a learning journey.

Setting personal goals makes your Enactus experience richer, more intentional, and more transformative. These goals can be connected to your project — or simply to the kind of leader, teammate, or innovator you want to become.

Ask yourself:

- What skills do I want to grow this year?
- Which roles energise me most — research, design, storytelling, finance, leadership?
- What feels slightly outside my comfort zone — and could help me grow?
- How will I track, reflect on, and celebrate my progress?

Sample goals:

- ✓ Facilitate my first team meeting
- ✓ Learn a new creative tool (Canva, Miro, Figma, etc.)
- ✓ Improve my public speaking confidence
- ✓ Lead a prototype session or co-creation workshop
- ✓ Build a simple impact or project dashboard
- ✓ Learn basic budgeting for a social enterprise
- ✓ Mentor a new team member
- ✓ Deliver a strong pitch at Nationals

About the Enactus 101 Series

This guide is part of the Enactus 101 Series — a set of simple, practical guides designed to help you learn, lead, build projects, measure your impact, and grow as a changemaker. We encourage you to explore the full series throughout the year.

THE ENACTUS 101 GUIDE SERIES (OVERVIEW PAGE)

Guide 1 — Welcome to Enactus & Your Impact Journey

The essential starting guide for all students. Introduces the Enactus mission, the Enactus Impact Journey Roadmap, core values, culture, and what it means to be an Enactus social innovator.

Guide 2 — Building an Enactus Team (Team Structure, Culture & Leadership)

How to build and lead a strong Enactus team. Includes team roles, leadership development, recruitment, culture-building, communication, conflict resolution, and running an effective student organization.

Guide 3 — Project Development & the Enactus Criterion

Your complete guide to designing strong Enactus projects. Covers research, systems thinking, human-centered design, community engagement, ideation, prototyping, the Enactus Criterion, and the Enactus Social Business Canvas.

Guide 4 — Measuring Impact (Data, Storytelling & Reporting)

How to measure, understand, and communicate your project impact. Includes impact definitions, theory of change, surveys, dashboards, storytelling basics, and how to prepare for annual data reporting.

Guide 5 — Preparing for Competitions (Nationals & World Cup)

Everything students need to succeed in competition. Covers storytelling strategy, presentation logic, project evidence, Impact & Financial Review expectations, evaluation forms and the judging role.

Guide 6 — Working with Partners & Advisors

How to build and manage strong partnerships. Includes engaging Faculty Advisors, activating Business Advisory Clusters, securing institutional support, collaborating with external partners, and ethical partnership practices.

Guide 7 — Faculty Advisor Guide

A practical support guide for educators. Provides tools for mentorship, academic integration, student development, project coaching, and navigating Enactus competitions and programs.

Guide 8 — Tools & Exercises for Enactus Teams

A practical resource for students and teams. Includes worksheets, exercises, and facilitation tools such as needs assessment activities, systems maps, ideation prompts, prototyping tools, impact measurement checklists, and team culture exercises.
